## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 10\_Q3

Attempt : 1

Total Mark : 10

Marks Obtained : 10

#### **Section 1 : COD**

##### **1. Problem Statement**

Priya is analyzing encrypted messages in a research project. She wants to analyze the frequency of each character in a given paragraph. The characters should be stored in a TreeMap so that the output is sorted in ascending order of characters automatically.

You are required to build a Java program that:

Uses a TreeMap<Character, Integer> to count how many times each character appears in the message.Ignores spaces and considers only alphabets (case-sensitive).Outputs the frequencies of characters in sorted order.

You must use a TreeMap in the class named MessageAnalyzer.

#### ***Input Format***

The first line of input contains an integer n, the number of lines in the message.

The next n lines each contain a string (the encrypted message line).

### ***Output Format***

The first line of output prints: "Character Frequency:"

Then print each character and its frequency in the format: "<character>: <count>"

Refer to the sample output for formatting specifications.

### ***Sample Test Case***

Input: 2  
Hello World  
Java

Output: Character Frequency:

H: 1  
J: 1  
W: 1  
a: 2  
d: 1  
e: 1  
l: 3  
o: 2  
r: 1  
v: 1

### ***Answer***

```
import java.util.*;
class Main{
    public static void main(String[] args){
        Scanner sc=new Scanner(System.in);
        int n=sc.nextInt();
        TreeMap <Character,Integer> freqMap = new TreeMap<>();
        for(int i=0;i<=n;i++){
            String s= sc.nextLine();
            for(char ch:s.toCharArray()){
                if(Character.isLetter(ch)){
                    freqMap.put(ch,freqMap.getOrDefault(ch,0)+1);
                }
            }
        }
    }
}
```

```
        }
    }
}
System.out.println("Character Frequency: ");
for(Map.Entry<Character,Integer>entry: freqMap.entrySet()){
    System.out.println(entry.getKey()+": "+entry.getValue());
}
}
```

**Status : Correct**

**Marks : 10/10**
